

VC's Message

It is indeed a great honor and privilege to head a prestigious Medical University and that also of my native State. I am really fortunate that I have been entrusted with the responsibility of nurturing plant so that tomorrow it becomes a gigantic tree and gives shade to many. The task is enormous but I am confident that with the cooperation, help and efforts of each one, the job will be cut short and accomplished with great zeal and enthusiasm. My focus and priority would be improving the standards of Medical Education by developing and improving the existing Courses along with introduction of new advance Professional Courses, superspecialities and Programmes. Along with this, I would like to throw my weight on overhauling and development of Hospitals, a task very close to my heart. Needless to mention that for the last three decades, I have been a pioneer in establishing the specialty of Hospital/Health Administration in the State of Uttar Pradesh thereby developing the concept and techniques of quality, cost containment, resource/ capacity utilization etc. for providing solid support to patient care, teaching, research and training for Doctors/Nurses/Technicians and Para Medical. This will provide us an additional advantage in growth of this university. Let us strive to make our Medical University a model university of the country with high standards of teaching and research. I am confident that in our case, we will always get timely and adequate support and cooperation from government, academicians, administrators, medical fraternity and public as and when required. Let all of us today pledge that we will strive hard to the best of our capacities and capabilities to develop this University into an excellent center of light and learning.

Jai Hind.....!
